

GOTBERG

Wines with special attributes

WHITE WINES

Ryzlink Rýnský
late harvest

0,75l Sparkling wine with a beautiful light olive color with a typical varietal and tender apricot aroma and taste with citrus tones. Light, pure and mineral-rich wine with slightly spicy acidity gives a youthful and pleasant impression. 390,-

Chardonnay late
harvest

0,75l Chardonnay 2018 has an attractive green-yellow color. The aroma is pure, harmonious and interestingly varietal. We can find the smell of green gooseberries and blackcurrants. The taste is full of semi-dry, mineral and in the end completed with pleasant acid. 390,-

Sylvánské
zelené selection
of grapes

0,75l Wine of linden flower color, with a spicy aroma of gooseberry jam and acacia blossom. The taste is full, extractive, slightly spicy with pleasant fresh acid. Maturing on the bottle, our Sylván green will be characterized by full oily consistency, pleasant smoothness and supple harmony. 390,-

Pálava late
harvest

0,75l Pálava is one of the most typical varieties of the locality and also the flagship of the Gotberg winery. It is a fresh and interesting breeding miracle from Moravia. It is characterized by a straw yellow color with green reflexes, the aroma of tropical fruits especially lychee, pineapple with unmistakable spicy taste with distinctive tones of fresh vanilla. 440,-

RED WINES

Rulandské
modré selection
of grapes

0,75l Pinot Noir in the selection of berries has a dark ruby color. The rich aroma of this wine excel in tones of marmalade from dark fruits, forest raspberries and a slight hint of smoke. The taste is massive, mineral, with a cherry in dark chocolate at the end. Very fine and attractive tannins in conjunction with light residual sugar predetermines this wine for very long aging on the bottle. 440,-

HISTORY OF WINERY

Gotberg

Gotberg entered the wine map of South Moravia in 2010 when he presented his first wine collection to the public. The winery bet on top quality attributive wines and focused on varieties that belong to the local area and which are doing well here, such as Pálava, Riesling, Sylvaner Greens, Pinot Noir and others.

The vines were planted on rounded terraces with peach-almond trees, rose hips, wild sour cherries and liquorice. The specific character is given to the wine by deep loess soils rich in calcium content of the three vineyards Panenský kopec, Svidrunk and Sonberk, which Gotberg farms.

The Gotberg winery puts great emphasis on the cultivation of high-quality grapes, which do not use any chemicals to treat them. The winery also participates in the joint Czech-Austrian project ECOWIN - Nature Conservation by Greening Viticulture. The winery is located near Hustopeče in the village of Popice, whose wine tradition dates back to the 13th century. The winery is housed in a building that has been awarded the "Best Industrial Building of the South Moravian Region" and is a beautiful example of modern wine architecture.

the dominant feature of the Pálava region, which makes each visit unrepeatable in any season.
